Introduction

1.1 Purpose

The purpose of the Sustainability and Resilience Strategy 2016 – 2021 is to shape the City of Subiaco’s approach to becoming a sustainable and resilient community.

1.2 Legislative Context

The Local Government Act (1995) includes a specific section relating to sustainability, which is based upon the most commonly used definition of sustainable development. Section 1.3(3) of the Act states:

In carrying out its functions a local government is to use its best endeavours to meet the needs of current and future generations through an integration of environmental protection, social advancement and economic prosperity.

The Planning and Development Act (2005) also refers to sustainability, stating that its purpose is:

To promote the sustainable use and development of land in the State.

1.3 Strategic Context

The City’s commitment to sustainability is embedded in the vision detailed in the City’s Strategic Community Plan (SCP):

...Sustainability, in all its forms, is at the core of the community and underpins the City’s operations.

This vision is articulated throughout the SCP and in particular in Key Focus Area 6.1.6 where the City aspires to:

“Be proactive and innovative in its approach to environmental sustainability and climate change, especially resource conservation, recycling and green energy.”

The Sustainability and Resilience Strategy outlines how Subiaco will realise this vision and ultimately deliver a sustainable City.

---

1 Parliament of Western Australia, Local Government Act 1995 (WA). s 1.3 (3).
2 Parliament of Western Australia, Planning and Development Act (2005).
1.4 The Strategy

The Sustainability and Resilience Strategy outlines a comprehensive set of actions for the City of Subiaco to implement in order to become a leader in sustainability aligned with the principles of the One Planet Living Framework. The Strategy is a dynamic and responsive framework and is the responsibility of the whole organisation and Council.

The strategy is comprised of a Sustainability and Resilience Action Plan, which will function as an internal progress report, identifying timelines and responsibility for action. The Action Plan will be embedded into the Corporate Business Plan and integrated with relevant branch plans on an annual basis. It is intended that the current Sustainability and Resilience Strategy will be implemented over a five year period with an annual report being provided to Council.

In developing a strategy for sustainability, the City of Subiaco embarked on both a diagnostic and a dialogical investigation in order to understand key sustainability gaps in service delivery and in organisational structure. The diagnostic investigation enabled the City to benchmark its progress against the 10 sustainability principles of the international One Planet Councils Framework.

The One Planet framework is rooted in the science and metrics of ecological and carbon footprinting, 10 principles are used to structure thinking and inform holistic action around sustainability and the framework also serves as a benchmarking tool so that Local Governments around the world can compare their performance.

Subiaco was assessed according to the 10 parameters of the framework outlined in Figure 1 below.

---

**Figure 1 – The 10 principles of the One Planet Council Framework**

<table>
<thead>
<tr>
<th>Principle</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Health and happiness</td>
<td>Encouraging active, social, meaningful lives to promote good health and well-being</td>
</tr>
<tr>
<td>Equity and local economy</td>
<td>Creating bioregional economies that support equity and diverse local employment and international fair trade</td>
</tr>
<tr>
<td>Culture and community</td>
<td>Respecting and reviving local identity, wisdom and culture; encouraging the involvement of people in shaping their community and creating a new culture of sustainability</td>
</tr>
<tr>
<td>Land use and wildlife</td>
<td>Protecting and restoring biodiversity and creating new natural habitats through good land use and integration into the built environment</td>
</tr>
<tr>
<td>Sustainable water</td>
<td>Using water efficiently in buildings, farming and manufacturing. Designing to avoid local issues such as flooding, drought and water course pollution</td>
</tr>
<tr>
<td>Local and sustainable food</td>
<td>Supporting sustainable and humane farming, promoting access to healthy, low impact, local, seasonal and organic diets and reducing food waste</td>
</tr>
<tr>
<td>Sustainable materials</td>
<td>Using sustainable and healthy products, such as those with low embodied energy, sourced locally, made from renewable or waste resources</td>
</tr>
<tr>
<td>Sustainable transport</td>
<td>Reducing the need to travel, and encouraging low and zero carbon modes of transport to reduce emissions</td>
</tr>
<tr>
<td>Zero waste</td>
<td>Reducing waste, reusing where possible, and ultimately sending zero waste to landfill</td>
</tr>
<tr>
<td>Zero carbon</td>
<td>Making buildings energy efficient and delivering all energy with renewable technologies</td>
</tr>
</tbody>
</table>
The City received an overall score of 48%, with 50% being the threshold to received One Planet Council certification. This indicates that there are both small steps to take to achieve certification as well as more significant opportunities for Subiaco to become a leader in this area, to take stronger action to more deeply embed sustainability in its operations and its community. The City will need to achieve an overall rating of 80% across all principles in order to demonstrate leadership.

As well as the ten principles of the One Planet Councils Framework, this Strategy contains an additional principle – Governance - which will enable the City to embed sustainability into its operations and decision making processes.

The City is performing well in the areas of transport, waste, culture and heritage, water, and health and happiness. In order to demonstrate leadership in sustainability, the City will need to improve its performance in energy, sustainable materials, sustainable and local food, and equity and the local economy. The city’s performance against each of the 10 principles is shown in figure 2 below.

**Figure 2 – City of Subiaco One Planet Council rating**
The City is performing well in the areas of transport, waste, culture and heritage, water, and health and happiness. In order to demonstrate leadership in sustainability, the City will need to improve its performance in energy, sustainable materials, sustainable and local food, and equity and the local economy.

The dialogical investigation enabled the City to identify opportunities and barriers within the organisation affecting the implementation of sustainability. Opportunities to improve sustainability implementation include:

- better communication, procurement and project management strategies;
- the adoption of safe to fail experiments;
- better leadership and conditional support;
- better governance structures and decision making processes; and,
- leveraging on past successes for future practice.

The investigation highlighted that sustainability:

- was not seen as a strategic priority;
- there was a poor shared understanding of what sustainability means;
- there was poor communication of practices;
- sustainability was viewed as a cost rather than an investment; and,
- existing governance and decision making processes were limiting sustainability practices.

As a result of these findings, the City added governance to the principles of its sustainability framework, to enable the recommendations of the dialogical investigation to be incorporated into the strategy. As a public sector organisation, governance is a critical element of any successful strategy.

The City’s Sustainability and Resilience Strategy brings together the actions the City needs to take to demonstrate leadership and continuously improve its performance. It sets out tangible actions and meaningful goals.

Following the five year term of the plan, a new baseline will be determined against the One Planet Living Framework and a new strategy developed.
The City of Subiaco’s Sustainability and Resilience Strategy is embedded in its corporate strategic planning framework which is illustrated below. It is intended that the actions identified within this Strategy will be delegated to and implemented by each relevant Branch Plan.

**Figure 3 – Hierarchy of Plans**
Implementation

The actions identified in this Strategy will be embedded in each of the relevant Branch Plans, which are updated on an annual basis. The Sustainability and Resilience Action Plan will detail responsibility and timeframes for achievement. This will ensure that sustainability becomes a whole-of-organisation task, with responsibility vested across Council.

The City will provide an annual report of progress to Council and the community. The Sustainability and Resilience Strategy will be reviewed annually as needed. It is anticipated that the strategy will be implemented over a five year period.

The implementation of this plan will elevate the city’s status to ‘International Leadership’ in accordance with the one planet framework.

Funding and Resource Implications

The majority of actions contained within this plan can be accommodated within existing operating budgets. For those projects which require additional funding, branch Managers will assess budget constraints each year when developing branch plans and any variations will be considered in the annual budget.

Should additional funding be required for specific projects, this will be addressed at the time of annual budget planning.
The Sustainability and Resilience Plan is comprised of four separate documents as follows:

1. **Sustainability and Resilience Strategy Summary**
   The summary document (this document) outlines the context of the City’s sustainability and resilience strategy and its current status in relation to the principles of the One Planet Councils Framework.

1.1 **The Sustainability and Resilience Action Plan**
   The Action Plan summarises and tabulates all of the actions to be taken to implement the strategy. It also provides a template for status reporting which will be provided annually.
   The summary and action plan form the operative component of the overall strategy.

2. **The Sustainability and Resilience Strategy Detailed Plan**
   The Detailed Plan is a comprehensive document which builds upon the action plan, providing the logic and context for the City’s approach to sustainability and resilience. The approach to each principle contains:
   - A vision
   - The context for the principle
   - The City’s current status
   - Achievements to date
   - Actions to achieve the vision
   This document is core to the strategy but is not intended for public consumption. Rather, it is intended as a working document which enables the implementation of the strategy by providing a sound basis for the action plan.

3. **The Sustainability and Resilience Strategy Concept Paper**
   The Concept Paper outlines the methodology behind the development of the sustainability strategy. It includes a global context and key learnings from the process, serving to provide an example for others to follow. The City’s approach to the development of this strategy is innovative and demonstrates leadership in the field of sustainability.

</tr>
<tr>
<td><strong>Behaviour change problems</strong></td>
<td>Develop and implement a targeted sustainability behaviour change program using existing infrastructure such as schools and community groups.</td>
<td>Operations and Environment Services; Cultural Services</td>
<td></td>
<td></td>
<td>✔</td>
</tr>
<tr>
<td></td>
<td>Participate in a bin tagging program, which targets behaviour change.</td>
<td>Operations and Environment Services</td>
<td></td>
<td></td>
<td>✔</td>
</tr>
<tr>
<td><strong>Events</strong></td>
<td>Develop event management guidelines that include efforts towards waste minimisation for all events in the City of Subiaco requiring approval.</td>
<td>Office of the CEO; Cultural Services; Place Development</td>
<td>✔</td>
<td>✔</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Develop and implement food waste collection and composting specifically for events.</td>
<td></td>
<td></td>
<td></td>
<td>✔</td>
</tr>
</tbody>
</table>
## Part five Action Plan – Waste

<table>
<thead>
<tr>
<th><strong>Planning</strong></th>
<th>Develop a policy and guideline which addresses opportunities to achieve a ‘zero waste’ future.</th>
<th>Planning Services; Operations and Environment Services</th>
<th>✓</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Lead by example</strong></td>
<td>Investigate and implement opportunities to minimise waste in internal City operations and demonstrate leadership by adopting practices such as specifying the use of recycled materials in all construction projects.</td>
<td>Operations and Environment Services; Office of the CEO (ELT); Procurement</td>
<td>✓ ✓ ✓</td>
</tr>
<tr>
<td><strong>Bulk waste and hard rubbish and green waste verge collections</strong></td>
<td>Undertake a review of the hard rubbish collection practice and make recommendations to encourage reuse and minimise hard rubbish to landfill.</td>
<td>Operations and Environment Services</td>
<td>✓</td>
</tr>
<tr>
<td></td>
<td>Support the establishment of a local community group to develop a local or regional community resource recovery centre (tip shop), which would divert usable items to landfill.</td>
<td></td>
<td>✓</td>
</tr>
<tr>
<td></td>
<td>Work with the community to develop a social enterprise to build the capacity of the ‘op shop’ model to act as an excellent resource for the reuse of items such as clothing.</td>
<td>Community Services; Cultural Services</td>
<td>✓</td>
</tr>
<tr>
<td><strong>Technology</strong></td>
<td>Continue to support the recovery of organic waste from the waste stream through the WMRC or by other means.</td>
<td>Office of the CEO (ELT)</td>
<td>✓ ✓ ✓ ✓</td>
</tr>
<tr>
<td><strong>Australian Standard Bin Colours</strong></td>
<td>Adopt the Australian standard bin colour system.</td>
<td>Operations and Environment Services</td>
<td>✓</td>

## Local & Sustainable Materials

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Measurements and targets</strong></td>
<td>Develop and adopt targets for the use of sustainable materials.</td>
<td>Operations and Environment Services; Office of the CEO (ELT)</td>
<td>✓</td>
<td>✓</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Investigate the measurement of embodied CO₂ of materials throughout the design and construction process and use this in decision making when procuring goods and services.</td>
<td>Operations and Environment Services</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td><strong>Low embodied energy</strong></td>
<td>Prioritise construction materials that are low impact, durable, local and reclaimed. High environmental impact or polluting materials (such as PVC and aluminium) will be avoided. Identify key opportunities and develop plans to reduce the impact of these materials.</td>
<td>Project Delivery</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td></td>
<td>Consider the lifecycle impact of buildings in design, to enable easy maintenance and longevity as well as consideration for deconstruction so that on decommissioning the materials can be recovered and re-used.</td>
<td>Project Delivery; Field Services, Building and Health and Place Development</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
</tr>
<tr>
<td><strong>Procurement</strong></td>
<td>Adopt an increased sustainability weighting for goods and services procured, which includes a set of indicators to consider including energy, water use and quality, air pollution, toxic substances and resource intensity.</td>
<td>Corporate Services (Financial Services); Operations and Environment Services</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Require that suppliers, goods, services and processes minimise negative environmental and social impacts.</td>
<td>Office of the CEO</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>Develop a list of toxic and hazardous materials that are prohibited from being specified/used.</td>
<td>Buildings Health and Compliance</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
<tr>

<td>Encourage staff to use the Sustainable Procurement Data base, through the development of supplier sustainability principles to manage sustainability within Council’s supply chain.</td>
<td>Operations and Environment Services</td>
<td>✓</td>
<td></td>
<td></td>
</tr>
<tr>
<td><strong>Waste minimisation</strong></td>
<td>Use the Strategic Waste Minimisation Plan to include a broader focus on sustainable materials when implementing community actions and proposing any amendments to the Town Planning Scheme.</td>
<td>Planning Services</td>
<td>✓</td>
<td>✓</td>
<td>✓</td>
</tr>
</tbody>
</table>
### Part five Action Plan – Local and Sustainable Materials

| Education and advocacy | Provide information on reducing the impact of goods through community education. Attract property management companies and other service providers to the community who will support this approach. Provide services that facilitate the sharing of goods, such as through a share library, especially goods that are used infrequently but have a high embodied energy such as power tools. | Office of the CEO (Communications) | ✓ | ✓ | ✓ | ✓ | Community Services; Field Services, Building and Health and Place Development | ✓ | Cultural Services | ✓ | ✓ | ✓ |
