

Verge Policy fact sheet

Verge maintenance

Residents are encouraged to maintain the verge adjacent to their property for their own benefit and the benefit of their community within the verge guidelines as follows:

- the mature height of vegetation other than trees or indigenous midstorey plants such as grass trees or banksias must be maintained below 500 mm
- in areas of high visibility where a property owner/resident is not inclined to maintain the verge adjacent to their property, the city will mow (once only) the verge annually to ensure public safety and to maintain a level of amenity.

Images: verges maintained within guidelines.

For further information please refer to the city's Verge Policy management guidelines available at www.subiaco.wa.gov.au
