MAINTAINING OUR URBAN FOREST: CAPE LILAC TREES

Did you know that the city manages 72 Cape lilac trees? Each of these trees is inspected weekly to determine whether white cedar moth caterpillars are present – if they are detected, the city commences a control program. This program was first implemented in 2010 and has resulted in a considerable decline in the incidence of caterpillars across the city. Residents’ assistance in controlling the caterpillars on private property is essential and benefits both the city and the community. More information is available from the Department of Agriculture website at www.agric.wa.gov.au or by calling the city on 9387 0942.
