\$5 all-day parking on Stubbs Tce

Parking on part of Stubbs Terrace will now only cost drivers \$5 for a whole day – down from \$10.

The reduction in cost seeks to help ease parking congestion on residential streets surrounding King Edward Memorial Hospital with many hospital staff and visitors looking for affordable all-day parking in the area.

Stubbs Terrace Car Station 70 (south side of Stubbs Terrace, west of the Daglish train station) is only a short

walk from the hospital and train station.

For more information, including a map of the car station, head to www.subiaco.wa.gov.au/news.

Remember, it's also free to park across the City of Subiaco (in SubiPark carparks or street parking) all weekend and every weekday evening after 5pm.

Lake update for summer

It's usual for both Mabel Talbot and Lake Jualbup to dry out each summer; these are natural occurrences because both lakes are dependent on rainfall to fill up.

The City will not be pumping water artificially into the lakes as they are natural systems, and we do not have the groundwater allocation available to be able to fill them up.

As the lakes dry out, algae and avian botulism become an increasing concern but the City is working hard to mitigate this including adding beneficial bacteria that outcompetes the botulism strain and installing shallow-water aerators.

Residents may see some deceased fish at the lakes throughout the summer; these are invasive fish that the City has proactively been removing to help improve the health of these lakes and native wildlife.

Drying wetlands can be dangerous to birds as they may become stuck in the mud. If you see a bird trapped or injured at Mabel or Jualbup, please call WA Seabird Rescue on 6102 8464.

For more information, visit www.subiaco.wa.gov.au/news.

2024 heritage highlights

Subiaco's rich history and cultural heritage were celebrated through several initiatives and projects in 2024 – now highlighted in a new document on the City's website.

'Heritage Achievements 2024' looks at the year that was, recognising the importance of the area's rich history and preserving it for future generations.

It explores the central role Subiaco Museum has played and includes built heritage highlights such as the review of the Daglish Local Heritage Survey – which saw 16 new heritage sites added.

The document also details highlights such as the 100th anniversary of the Daglish Railway Station.

To view the document in full, visit the heritage news and projects webpage or find the story at www.subiaco.wa.gov.au/news.

Short Back and Sidewalks comes to Subiaco

The City of Subiaco's weekly homelessness support walk-in centre is welcoming Short Back and Sidewalks every six weeks (between 12pm and 2pm) starting from Wednesday 19 February.

Short Back and Sidewalks is a free hair-cutting and grooming service for members of the community who are experiencing homelessness; they aim to create meaningful connections through conversation.

The City has engaged The Salvation Army's Homelessness Services Team to deliver a weekly walk-in centre at The Third Place on Barker Road in Subiaco since September 2023 to help support some of our most vulnerable community members.

To find out more, visit www.subiaco.wa.gov.au/news.

March grant round now open

Applications are now open for the next City of Subiaco Community Development Grant round, with up to \$5000 available to eligible not-for-profit incorporated organisations working to improve the health and wellbeing of our community.

Applications close **5pm Friday 28 March 2025**.

For more information, including the guidelines and application forms, please visit www.subiaco.wa.gov.au/commdevgrants or contact the City's Senior Community Development Officer at culture@subiaco.wa.gov.au, or 9237 9328.

Green energy agreement renewed

The City is set to renew its participation in a renewable energy agreement to continue reducing its carbon emissions across its operations.

The City first signed on to the Sustainable Energy Project – coordinated by WALGA – in November 2021 with the aim of reducing the amount of energy derived through fossil fuels by utilising local renewable energy sources, with the bonus of reducing energy supply costs.

The project has helped the City work towards ambitious carbon reduction targets while bolstering the WA renewable energy industry.

Upcoming bulk green waste collection

The City's next bulk green garden waste collection will commence on **Monday 3 March**.

Please place loose green garden waste on your verge (not in bags) by 7am Monday 3 March. It will be collected throughout the course of the week.

There is no limit to the quantity of green waste that you can put out but piles will need to be visible from the road and not include large branches/tree limbs that have been commercially looped.

Please do not place any items in right of ways or laneways.

For more information, please contact the City on 9237 9222 or waste@subiaco.wa.gov.au.

Recycle e-waste and batteries properly

City residents are encouraged to recycle right when it comes to e-waste and batteries to prevent waste truck and facility fires, divert waste from landfill, recycle materials for new products, and avoid hazardous waste from harming others.

The State Government has banned the disposal of e-waste in landfill. Many materials in common electronics can be recycled or reused to give them a second lease on life.

Residents can drop off much of their e-waste at the West Metro Recycling Centre in Shenton Park for free. Dead batteries can be taken to the West Metro Recycling Centre, or participating Bunnings, Woolworths or Coles stores.

For more on how to recycle different items, head to the Recycle Right website or call the WMRC Recycling Hotline on 9384 6711.
