

Building Services Certification Services

What do we do

The City of Subiaco has a team of qualified building surveying professionals. The team has extensive experience in all aspects of building, design construction, certification and inspections on projects of any scale and complexity.

The team provides full building surveying services throughout the City of Subiaco, including preliminary building regulatory advice and can provide advice through the entire building process from conceptual design to final completion.

By engaging the City's building team, you will benefit from our direct access to a range of resources from various departments within the city, including building contract, site services, town planning and health services. Providing a one stop shop.

Please contact the building department to discuss your proposal and obtain an appraisal / quotation on your project.

To request a certification, you will be required to complete a request for either of the following which are all available on the city's website.

- Certificate of Design Compliance
- Certificate of Construction Compliance
- Certificate of Building Compliance
